Our Amanita Pantherina Mushroom Tincture is 10-15X stronger than Amanita Muscaria. The tincture contains active ingredients, as we employ a decarboxylation process that applies gentle, controlled heat to the formula. This activates the desirable compounds so that they are bio-available to the body. We also use a meticulous detoxification process by purifying these desirable compounds and removing any potential toxins that may be present in the mushroom extract, followed up with thorough testing by a third party.

Our Amanita Muscaria Mushroom Tincture highlights a perfectly legal mushroom that grows in the wild, and is renowned for its spiritual value. Our 30ml dropper bottle features an amber glass exterior that keeps the contents fresh and potent, while each bottle contains a generous 2,000 milligrams of our purified Amanita Muscaria extract. The mushroom itself grows easily all over the world, and is easy to spot for its red cap with white spots. You may have even seen it in popular culture, as it's one of the most recognizable mushrooms of all time.
